

Optos *Telehealth Solutions*™

The people most vulnerable to preventable vision loss are often the least likely to see an eye doctor. For this reason, primary care doctors are bringing eye health screening to patients at the point of care.

Optos *Telehealth Solutions* bridges the gap from patient to expert eye exams. This configurable solution accommodates various cameras, provides convenient secure data sharing and storage, and integrates with many electronic health record systems.

Optos *Telehealth Solutions* can facilitate eye health screening in virtually any setting.

Image Acquisition

Fast, efficient imaging is a key element in successful screening. *Optos Telehealth Solutions* can accommodate Optos retinal imaging devices, the Nikon RetinaStation, and DICOM compatible fundus cameras.

Secure Data Management

The web-based system facilitates HIPAA compliance, easy data sharing, and secure storage.

Image Review

From in-network reviewers to external reading centers, Optos offers review options suitable for every practice.

EHR Integration

The DICOM based system accepts HL7 orders and interfaces with vendor neutral archives.

Patient Report

The customizable patient report provides referral guidance and meets requirements for photographic diabetic retinopathy screening.

Optos *Telehealth Solutions*™

More than 900 peer-reviewed articles and thousands of case studies and testimonials show the value of Optos retinal imaging in screening, diagnosis, treatment planning, and patient engagement.
